

Recycle Value Assessment (RVA) Overview

Circular Solutions' **Recycle Value Assessment (RVA)** helps venues evaluate and optimize recycling performance across front-of-house (FOH) and back-of-house (BOH) operations. The goal: **verify true recycling outcomes, increase landfill diversion, and demonstrate sustainability leadership** across every competition site, hospitality area, and fan venue.

What is a Recycle Value Assessment (RVA)?

An RVA is a **hands-on or virtual audit** of a venue's recycling and sustainability operations. Circular Solutions analyzes bin placement, signage, hauler practices, and material handling to identify contamination issues and recovery opportunities.

Each venue receives:

Comprehensive RVA Report

A **comprehensive RVA Report** with visuals and clear recommendations.

Best-Practice Guidance

Tailored best-practice guidance for staff, concessionaires, and haulers.

Digital Dashboard

A **digital dashboard** summarizing verified recycling performance.

Platform Integration

Optional integration into the **CS Verify** and **CS Track** platforms for ongoing monitoring.

What The Property Needs To Provide?

To prepare for the RVA meeting, each venue should compile the following:

Visuals & Documentation

- Photos of FOH bins (paired/unpaired), liners, tops, and signage.
- Examples of beverage cups, bottles, or cans used (PET, aluminum, paper).
- Overview of BOH operations – compactors, roll-offs, or sorting stations.

Operational Details

- Description of waste-handling process (who collects, when, where).
- Information on hauler and MRF partners (if known).
- Any challenges observed (e.g., missing signage, limited space, mixed waste streams).

What Circular Solutions Provides

For each venue, Circular Solutions will:

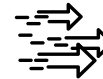

Analyze

- FOH/BOH systems, Review hauler coordination, and MRF recycling pathways.
- Validate that materials collected are being properly recycled.

Improve

- Deliver tailored recommendations to enhance bin systems, signage, and staff engagement.
- Provide guidance on hauler/MRF practices to improve recovery rates.

Accelerate

- Supply a **property-specific RVA Report** and dashboard summarizing verified outcomes.
- Quantify **landfill diversion, CO₂ savings, and cost efficiencies**.
- Provide **media-ready materials** (logo, certificate, and sustainability badge) for storytelling and public recognition.
